

PHOENIX
BUSINESS DATA CONSULTING

PHOENIX DATA, AI & PRODUCT LEADERSHIP PROGRAMME

Where Data, AI And Product Strategy
Meet Leadership.

 Courses

Data Governance, GDPR & NDPR for Professionals

A compliance and risk-focused programme that strengthens organisational capability in responsible data use, governance frameworks, and regulatory fundamentals.

Duration:

2 Days
(4–5 hours daily)

**Delivery Mode:**

Live, instructor-led
virtual sessions

This programme helps professionals and organisations establish stronger governance and compliance practices around data. Participants learn how governance frameworks work in practice, the fundamentals of GDPR and NDPR, and how to reduce risk through controls, accountability, and responsible data handling.

Module 1 – Power BI Fundamentals for Business Reporting

- What data governance is and why it matters
- Frameworks and accountability models (roles, ownership, stewardship)
- Policies, standards, and operating rhythms for governance

Module 3 – Privacy Controls & Data Lifecycle Management

- Access control, retention, and secure handling
- Risk identification: where breaches typically happen
- Practical control mapping: what good looks like

Module 2 – GDPR & NDPR Fundamentals

- Core principles and lawful bases for processing
- Consent, transparency, and individual rights basics
- Data processing boundaries and organisational responsibilities

Module 4 – Risk, Breach Prevention & Case Studies

- The organisational cost of weak governance: reputational, legal, and financial impact
- Real-world breach failures and lessons learned
- Practical exercises: identify governance weaknesses and compliance risks

● Benefits

- Improve compliance awareness and reduce operational risk
- Strengthen accountability for data handling across teams
- Prevent common governance failures that lead to breaches
- Support trust, transparency, and responsible data practices
- Build readiness for audits, vendor checks, and corporate governance reviews

● Who This Course Is For

- Compliance and risk teams
- HR, operations, and teams that handle sensitive or regulated data
- Managers and organisational leaders
- Data owners, stewards, and administrators
- Organisations operating across Nigeria/UK or handling cross-border data

What to Expect

What to Expect

Phoenix programmes are delivered with a practical, structured methodology designed to ensure participants can apply what they learn immediately in real business environments.

- Live, instructor-led virtual sessions with real-time Q&A
- Hands-on exercises using real business datasets
- Step-by-step demonstrations and guided practice
- Interactive discussions and (where applicable) breakout collaboration
- Post-training resource pack (templates, practice files, and support materials)
- Short knowledge checks and applied tasks to reinforce learning

Certification

On successful completion, participants receive a digital Accredited Certificate of completion to be issued by the CPD certification service UK and Phoenix business data consulting. Certificates are CV and LinkedIn-ready, supporting professional development and internal promotion pathways.
